

Come together
ONE VISION ONE MISSION

ECONOMIC PEACE CENTER & EURASIA HEART FOUNDATION

Economic stability must be combined with health: healthy children in healthy families. Hence, economy and health are closely linked together.

Therefore, “**Economic Peace Center**” and “**EurAsia Heart Foundation**” fit together perfectly and complement each other and this is why both organizations decided to cooperate and support each other.

ECONOMIC PEACE CENTER

was founded by **Mr. Ayoob Kara**. He studied law books at Kiryat Ono College and public administration at the Tel Aviv University.

He was deputy to the Knesset and among other tasks, headed the Knesset Committee for Combating Alcohol and Drugs, was head of the Committee to Examine Foreign and Palestinian Workers and joined the government as a deputy minister in the Ministry of Development of the Galilee and the Negev and Regional Cooperation.

His other duties in government include:

- Deputy Minister of Development of the Negev and the Galilee
- The Minister at the Prime Minister's Office for Special Functions
- Israel's Minister of Satellite Communications and Cyber

ECONOMIC PEACE CENTER

Economic stability means peaceful development of individuals, families and societies resulting in improved relations between countries. Only the combination of physical health and economic peace allows a sound development of healthy and responsible individuals and families.

Economic Peace Center promotes economic stability and also supports the care of children with heart diseases. **EurAsia Heart Foundation** has a humanitarian tradition in the care of cardiovascular diseases in children and adults as well as in international teaching and education of the next generations of cardiovascular medical experts.

Economic Peace Center is a group of people who believe in Honorable Ayoob Kara's way whom in his deeds and vision for more than 40 years, calls for comprehensive solution in our vulnerable and restless area known as the Middle East, aiming on the desire peace between its neighboring countries. Peace as we all see it has no value if based on surrender of lands but mostly on strong economy relationships and benefits to the root people based on and genuine mutual respect, and sharing via economic action between the parties.

EURASIA HEART FOUNDATION

EurAsia Heart is a Swiss-based foundation established in 2006, which focuses primarily on heart surgery and cardiology in developing and emerging countries. The focus is on the treatment of congenital heart defects in children as well as in the field of acquired heart diseases in adults.

EurAsia Heart established a medical network in Eastern Europe, Asia and Africa, which deals with heart disease in children and adults. The physicians volunteer their services in local cooperation and support prevention and education.

EurAsia Heart Foundation is active in developing and emerging countries in Eastern Europe, Asia and Africa. The health care systems of these countries cannot be compared with those of industrialized countries. Support is therefore urgently needed.

Prof. Dr. med Dr. h. c. Paul R. Vogt

- Swiss Board certified for general surgery, heart and vascular surgery
- Initiator and President of **EurAsia Heart** - A Swiss Medical Foundation
- German, Russian and Ukrainian Board certified for cardiac and vascular surgery
- Consultant for cardiovascular surgery, Hirslanden Group, Klinik Im Park, Zurich, Switzerland
- Senior Consultant, Department of Cardiovascular Surgery, University Hospital Zurich, Switzerland

EURASIA HEART FOUNDATION

Our approach

Transferring knowledge, experience and skills directly to the local centres – this is the most effective way of support. The aim of EurAsia Heart Foundation is to guide, support and assist local professionals and to verify the application of what has been learned.

Aim of our cooperation

- To reduce the mortality rate during surgery.
- To reduce the complication rate during and after the operation, thus reducing the number of patients with secondary damage.
- To expand the spectrum of therapy and diagnostics so that more patients receive the treatment they need.
- To demonstrate cost efficiency in the treatment of patients with heart disease.
- To promote international cooperation.
- To organize and manage research and teaching in the context of international multi-centre studies and to guarantee implementation in accordance with the guidelines.
